Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2141

1. Claims 66-69 are presented for examination.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 66-68 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Nakanura patent no. 5,548,789.

4. As to claim 66, Nakanura teaches a method for receiving e-mails, the method comprising:

receiving a plurality of e-mails, including a first e-mail (col. 9 lines 8-20);

for at least the first e-mail, performing steps comprising:

separating a first e-mail header from a first e-mail message body (col. 7 lines 45-67);

storing said first e-mail message body in a first e-mail message body field (col. 7 lines 45-67);

separating information contained in said first e-mail header into a plurality of first e-mail header information items; storing said plurality of first e-mail header information items in a plurality of corresponding header information fields (col. 9 lines 8-20; col. 9 lines 51-64);

creating a link between (i) information provided with at least one of said plurality of first e-mail header information fields, (ii) information provided with at least a second of said plurality of first e-mail header information fields, and (iii) the first e-mail message body stored in a first e-mail message body field (col. 8 line 60 – col. 9 line 20); and

storing linking information sufficient to identify said link between said at least one information provided with said first e-mail header information field, information provided with said at least first e-mail second header information field and first e-mail message body field (col. 8 line 60 – col. 9 line 20);

wherein the header information fields include at least all of the fields in a group consisting of a recipient field, a sender field, a copied recipient field, and a message subject field (col. 9 lines 8-20; col. 9 lines 51-64).

5. As to claims 67-68, Nakanura teaches said at least first e-mail header information field, said at least first e-mail second header information fields, and said linking information are provided in one or more tables; creating one or more links for linking information provided with the first e-mail header information field with information provided with the second and a third of said plurality of first e-mail header information fields (col. 8 line 60- col. 9 line 64).

6. Claim 69 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the

Art Unit: 2141

base claim and any intervening claims.

7. The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985) *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

8. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

9. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

10. Claims 66-69 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-34 of

Art Unit: 2141

copending Application No. 11/173,661. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed invention has similar limitations as the cited claims of the U.S. patent applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
